

Application for Undergraduate Internship Enrollment
School of Computing and Augmented Intelligence

DIRECTIONS

- Student must verify their eligibility to register to earn Undergraduate Internship credit
 - <https://scai.engineering.asu.edu/cse-484-major-internship-program/>
- After verifying eligibility, students must complete sections 1 through 8 of this application
- Completed applications should be submitted directly to the appropriate SCAI Faculty Internship Coordinator for review. Note SER students need to first go to their advisors for approval.
 - Section 8 will identify the appropriate SCAI Faculty Internship Coordinator based on course subject prefix
- Upon final decision, students will be contacted via email regarding the decision and instructions on enrollment

Important Notes

* There is a limit on the amount of 484 credit a student can enroll into for any single academic semester. Refer to <https://scai.engineering.asu.edu/cse-484-major-internship-program/> for this information.

* There is a limit on the amount of 484 credit a student can apply towards their degree requirements. Students should refer to their Graduation Audit (DARs) for this information and contact their SCAI undergraduate advisor with any questions.

- Student Information

Last Name	First Name	ASU ID #
Kalaiselvan	Dhanush	1229212090
Major	Major Credit Hours Completed	Major GPA
Computer Science (Software Engineering)		3.41
ASU Email	Total Credit Hours Completed	Cumulative ASU GPA
dkalaise@asu.edu	90	3.41

2) Course Enrollment Information

Subject Area	Semester	Year	Credit Hours
CSE	Summer	2026	3

3) Employer Information

Company Name	Supervisor Name	Supervisor Email
Google LLC	Xin Liu	xinliupitt@google.com
Internship Starting Date	Planned Internship End Date	Hours Per Week
05/18/2026	08/14/2026	40

4) Description of the work to be completed during the internship:

During my internship, I will work as part of a collaborative engineering team on projects critical to Google ' s cloud ecosystem, particularly focusing on the Google Cloud Vertex AI dashboard. My responsibilities will include designing, developing, testing, and maintaining scalable software solutions that enhance user experience and system performance.

I will contribute to building and improving features within the Vertex AI platform, develop scripts to automate routine engineering workflows, and analyze system data to optimize performance and reliability. Additionally, I will work closely with peers, mentors, and cross-functional teams to solve complex technical problems and deliver high-impact solutions.

5) Description of the applicability of the internship to the academic program:

This internship directly aligns with my academic program in Computer Science by allowing me to apply foundational concepts such as data structures, algorithms, software engineering, distributed systems, and machine learning in a real-world setting.

Working on Vertex AI will also strengthen my understanding of cloud computing, AI/ML systems, and large-scale data processing, which are key areas in my coursework. The experience will bridge the gap between theoretical knowledge gained in classes and practical implementation in production-grade systems.

6) Description of how the position will provide experiential learning beyond the classroom:

This internship will provide hands-on experience in building and deploying software systems at scale, something that cannot be fully replicated in a classroom environment. I will gain exposure to real-world engineering practices such as code reviews, production deployments, system monitoring, and cross-team collaboration.

Additionally, working on live products like Vertex AI will allow me to understand user needs, system constraints, and performance trade-offs in a way that extends beyond academic assignments. The opportunity to collaborate with experienced engineers and contribute to impactful projects will significantly enhance my problem-solving skills, technical depth, and professional development.

7) Student Signature

Student Signature	Date
	03/20/25

8) Submit Application for Review

Students must submit their completed applications and all materials directly to the Faculty Internship Coordinator for review. The appropriate Faculty Coordinator depends on the subject prefix into which the student will enroll.
